Subman's said the central bank would keep an eye on oil prices, exchange rate and minimum support prices before it takes any decision.

"Factors such as broader emerging market currency movement, dollar strength and the trend in crude oil prices will drive the outlook for the INR in the immediate term, which will have an impact on the landed cost of imports as well as various commodity prices, thereby transmitting into the WPI inflation," said Nayak.

The ministry also revealed upwards the WPI for May to 4.8%, from 4.4% before.
